Taser Holsters

MTS produces the widest variety of Taser holster options offered in the market. Many agencies have been faced with the dilemma of how to add one more thing to the officer's already over crowded belt without leaving something off. With the growing number of agencies using Tasers, we set out to provide departments with holster options that not only met their needs but exceeded them. All of our holster versions shown are available for both the X26 and M26 model Taser Conductive Energy Weapons Systems.

Our standard model is a padded 1000 denier Cordura nylon holster with dual spare cartridge holders. A reliable 3/4" Fire Fighter helmet buckle with adjustable webbing secure the weapon in the holster. The buckle has extended tabs for better disengagement even with gloves on. The reason we do not use a thumb break release is because it can be easily popped open during a struggle or while chasing down a suspect.

Enhancements to our mounting system are what makes this holster so special. In our standard model we have incorporated a stainless steel backer plate with slots that allow for up to 30 degrees of rotation. Included are heavy gauge molded Kydex clips. The narrower clip is used for officers who place the holster on the gun belt's single layer portion while the wider clip provides the choice of placing the holster in portions of the belt that are doubled over and twice as thick. The clip has a velcro catch strap at the bottom that is undone to allow the holster to be placed on the belt and then re-attached. A second mounting system (shown below) is available for officers who have more room on their belt (4"). This version uses an all stainless steel backer that uses two belt keepers to hold the holster in place. As with our standard version, this one to allows for up to 30 degrees of rotation. Another advantage of this second version is that the same holster can be used with our optional mounting systems found in our crowd control product line. As with all of our holsters, you do not have to strip the belt down to get ours on.

A simple yet highly functional combination of a webbing slot with a velcro closure secure the spare cartridges to the holster. A unique feature of this open design is the fact that it allows officers to easily remove a spare cartridge even if they have gloves on. Dual spare cartridge carriers are standard on our holsters unless otherwise stated; however, custom holsters can be ordered without spare cartridge holders.

In order to help ensure reliability of the Taser weapon system, protection must be provided to the blast door. That's why we developed a unique molded Kydex insert that not only protects the blast door from damage, but also provides the holster with a rigid spine on both sides. In addition, this spine is curved to help reduce accidental disengagement of the cartridge from the weapon when drawing the weapon.

Taser Holsters

Quick Release Thigh Rig with adjustable length strap. (extra long length available)

This holster uses a 1" quick release buckle that is sewn to a webbing belt keeper. Advantages of this are that an officer can keep the female portion of the clip on the belt (additional clips can be ordered) allowing for quick on/off of the holster. Another advantage is that it takes up only 1" of space on the gun belt. The holster can be adjusted so that the butt of the Taser handle is just below the officer's belt down to mid-thigh. Extra long drop straps can be ordered for officers who want the holster to ride even lower. The leg strap is a 1 1/2" webbing and elastic combination that uses an adjustable quick release buckle. The real advantage to this holster is its molded Kydex backer that allows it to hug the officer's leg. This holster has all the same features found in our regular belt models including the dual spare cartridge holders.

ITEM # 253*-***

color - Black Cordura Nylon

Price - \$79.95 each

* Contents not included *

Yes, we do offer **free 30 day test and evaluations of our holsters**. In order to request a T&E unit you must be in a position or acting on behalf of a person within your agency who is responsible for evaluating equipment. Please fax your request on department letterhead with your name and contact information as well as a UPS ship-to address. Please include which version you are wanting to test and which hand you are going to use to draw the weapon, as well as if it will be a cross draw or not. Our fax number is (770) 534-1578 attention: Customer Service.

We are in the developmental stages of our crowd control system. There will be three versions offered. One will be set up as a thigh rig with spare six-cartridge pouch or a vest mount version that has a spare six-cartridge pouch. Both of these versions will use our regular holster (with dual spare cartridges) with the stainless steel belt keeper backer plate. We have incorporated the high capacity pouch to provide officers with a fair amount of resources at their fingertips without having to return to a staging area for additional supplies. Another item will be our spare cartridge pouch that will attach to a variety of tactical vests. This pouch will hold ten spare cartridges for even more versatility. The intention of these versions is for riot-type events where the agency still wants to have the Taser as an option.

Upgrade Kit

While Cordura nylon is our mainstay, we are currently looking into other materials such as Clarino Patent and Basket Weave leathers. If your agency is considering these materials please contact us about availability. Please note that the raw materials used in these type holsters are more expensive and may increase the cost of these holsters.

Upgrades-

Due to some problems with earlier mounting clips we are offering free upgrades to individuals or agencies that ordered holsters prior to 11/15/04. Please contact us for details on how to receive your upgrade.

Less Lethal Shotgun Munitions Case

This small yet extremely effective bag helps officers separate less-lethal from lethal shotgun rounds, and was specifically developed for patrol vehicles that carry a dual purpose shotgun. The ability to lock the zipper sliders together and the bag's bright orange color combine to help reduce the chance of munitions becoming mixed up by accident. Inside the bag are two small plastic transparent shotgun ammo boxes that hold 25 rounds each.

ITEM # 1000-003

color - Orange

Price - \$39.95 each

** Shotgun rounds not included **

Shot Sticks

Introducing our new Shot Stick for shotgun rounds. This device allows officers to carry 10 shotgun rounds in a strip for enhanced organization. The Shot Stick is designed to fit into our special thigh rigs and vest pockets and can easily be thrown into a BDU pants pocket or pack. Our latest version has a Velcro strip at the top for identification information.

ITEM # 1000-002

color - Black

Price - \$12.95 each

** Contents not included **

Less Lethal Shotgun Case

This case has been designed to store and organize your less lethal shotgun. Features of this bag include a fully padded weapons compartment, removable shoulder strap, zippered external pocket, an internal zippered mesh documentation pouch to hold medical forms and a zippered munitions pocket. Added security features like a locking zipper tab on the main zipper and screen printed "Less Lethal Shotgun" help to reduce confusion during stressful events. The internal munitions pouch has been designed to hold two of our Shot Sticks - not included (see Shot Sticks above) or boxed ammo. The weapon is held in place by three 3/4" quick release buckles.

Constructed of 1000 denier Cordura nylon fabric with YKK #8 & #10 coil zippers and Mil Spec 17337 webbing and DuraFlex Hardware. Foam padding is removable for cleaning purposes.

ITEM # 1000-001

color - Orange or OD Green

Price - \$139.95 each

** Contents not included **

12 ga Thigh Rig (40 Rounds)

The 40 round thigh rig was developed to allow an officer to carry a high volume of shotgun munitions for large scale riot situations. It is unique in its design in that it has a removable rigid box that holds the shells. Additional boxes can be ordered for rapid reloading of the thigh rig. An added benefit of this removable design is that the pocket on the thigh rig can be used to carry other types of equipment. As with all our thigh rigs, it has the quick release belt system.

ITEM # 1000-020

color - Black, Woodland Camo, OD Green

Price - \$99.95 each

* One rigid internal box included *

**** A 20 round thigh rig using two of our ten round Shot Sticks will be available soon. Call for details. ****

Modular Radio Pouch

Adjustable modular radio pouch. This item is designed to hold the majority of radios used in public safety today. The 1" modular webbing version can also be used on a tactical belt. Snap and Velcro models available.

ITEM # 5000-020

color - Black, Woodland Camo, OD Green

Price - \$39.95 each

* Other Versions Available *

Deluxe Shotgun Weapons Case

This case is based on our proven Less Lethal Shotgun Weapons case. Many of our customers who purchased our Less Lethal shotgun case came back and asked for a shotgun case that went just a little beyond the standard stock models offered by other companies. Features include a removable shoulder strap, internal zippered mesh pocket and munitions pocket to hold two of our Shot Sticks or boxed ammo (Shot Sticks not included - see page 4 to order). The weapon is held securely in place by three 3/4" quick release buckles.

ITEM # 3500-001

color - Black, Woodland Camo, OD Green

Price - \$129.95 each

Max Pack 24

This bag combines quality, versatility and copious space for munitions in one nice neat package. No more throwing handfuls of 37 or 40mm munitions into BDU pockets. This practical carrier allows your team's grenadier to arrive on the scene with maximum resources. Additional packs can be handed out to non-grenadier officers to further increase your munition resources. Designed to be worn on the left or right side with quick-connect shoulder strap and waist belt. Each round has a dedicated slot to provide organization of munitions in four rows of six. Dual zipper access allows you to separate various munitions for safer deployment in stressful situations. The center divider is removable, allowing transport of hand thrown devices.

ITEM # 1000-004
 color - Black, OD Green, Camo
Price - \$99.95 each
 * Rounds not included *

Miami Riot Control Pack

This item was developed for the Metro Dade Police Department to properly supply munitions officers assigned to the Mobile Field Force Unit. The center compartment holds twelve stingball style grenades. This compartment is divided with a removable divider that allows for separation of the different munitions. There are two outer pockets that hold one of our Shot Sticks per pocket. Two ten round Shot Sticks are included with each bag. Shoulder and waist straps both have quick release buckles on each end to allow the officer the ability to get the pack off quickly.

ITEM # 1000-005
 color - Black, OD Green, Camo
Price - \$109.95 each
 * Rounds not included *

37mm Thigh Rig

Our quick release thigh rig for 37/40mm munitions provides the ideal solution to officers acting in dual roles on a tactical team. The rapid detachable leg pouches use 1 1/2" quick release buckles to allow for quick change. Inside each pocket are divided compartments to secure the chemical munitions and reduce movement. These thigh rigs can be ordered in any combination - from our shot-gun version to 37/40mm version or a combination thereof.

ITEM # 1000-006R
ITEM # 1000-006L
 * Right & Left Leg Versions*
 color - Black, OD Green, Camo
Price - \$89.95 each
 * Munitions not included *

40mm Thigh Rig

The 40mm Thigh Rig is positioned more to the front of the thigh allowing for better access to munitions. A zippered pocket with divided internal loops keeps eight rounds of 40mm munitions organized and right at an officer's finger tips. Two 1 1/2" nylon webbing straps with elastic ends hold the rig securely to the officer's leg. As with all of our thigh rigs, it has the quick release belt system. Available in right or left hand versions.

ITEM # 1000-025R
ITEM # 1000-025L
** Right & Left Leg Versions**
color - Black, OD Green, Camo, Orange
Price - \$89.95 each
** Rounds not included **

40mm Stock Pouch

Stop throwing those spare rounds into your BDU pockets.

Our new spare rounds Stock Pouch fixes this problem which too many officers have had to deal with. Designed using a simple stock sleeve that allows the officer to carry two extra 37/40mm five inch shells. Longer shells can be used but will stick out more than the five inch shells. The Stock Pouch has an easy-on, easy-off design that works with any LL launcher on the market today. Pouch will need minor modifications to work with Sage style weapons that have the raised cheek piece.

ITEM # 1000-007
color - Black, OD Green, Camo, Orange
Price - \$29.95 each
** Rounds not included **

37/40mm Quick Release Sling

Never be without your less lethal option again!

MTS has designed a quick release sling system to allow an entry team officer the ability to carry a LL launcher on their back in addition to a slung primary weapon. Our sling provides a secure out of the way means to carry the LL launcher at the same time providing rapid access to the weapon in times of need. System can be worn under a primary weapon sling without interference to either weapon. Pouch will need minor modifications to work with Sage style weapons that have the raised cheek piece. Ask about our combined Sling/Stock Pouch combination!

ITEM # 1000-008
color - Black
Price - \$29.95 each
** Rounds not included **

37mm Weapons Case

Our fully padded 37/40mm launcher case was designed to provide effective transportation of a single shot gas gun with the added benefit of 3 pockets for munitions storage. Each pocket holds 4 shells in individual dividers with an ID window on the pocket's outside for rapid identification of pocket contents. Detachable backpack straps help reduce fatigue of officers having to hike into a location. The weapon is firmly secured in place with a two point restraint system.

ITEM # 1000-030

color - Black, OD Green, Camo

Price - \$159.95 each

* Contents not included *

40mm Weapons Case

The new dedicated 40mm Weapons case has been redesigned based on our proven 37mm weapons case. Our new case has been reconfigured to meet the needs of departments that stepped up to the 40mm single shot launcher and wanted to carry more munitions. The new design allows your munitions officer to carry four more rounds than our standard 37mm weapons case. Revised removable pack straps, four zippered pockets with divided munition slots, ID labels to confirm pocket contents, weapon retention straps, heavy duty padding and tough 1000 denier Cordura nylon fabric combine to make this one great deal. The new case will also work with standard 37mm weapons provided that the agency is only going to carry 5" shells.

ITEM # 1000-035

color - Black, OD Green, Camo

Price - \$159.95 each

Defender Chest Rig

Modular pack can be worn either to the front or the rear. Quick release buckles at the top and sides aid in rapid re-supply during incidents (for fastest re-supply consider adding additional kits). Shield officers can act as pack mules by wearing the kit on their back. When additional resources are needed it's only a few steps away. Kit can be added to any H style harness or tactical vest that has loops (all hardware included). This Kit is designed to hold 12 Stingball or similar sized munitions, 10 short (5") 37/40mm munitions and 20 rounds of 12 ga. Super Sock or Launching cartridges. We've also included two of our handy Shot Sticks for keeping the shotgun rounds in place. End pockets can also be used to hold distraction devices.

ITEM # 1000-040

color - Black, OD Green, Camo

Price - \$129.95 each

* Contents not included *

Stingball/12ga Chest Pack

Modular chest rig can be worn either to the front or the rear. Quick release buckles at the top and sides aid in rapid re-supply (provided you have additional kits) during incidents. Shield officers can act as pack mules by wearing the kit on their back. When additional resources are needed it's only a few steps away. Kit can be added to any H style harness or tactical vest that has loops. Kit will hold 12 Stingball sized munitions and 20 rounds of Super Sock or Launching cartridges. We've also included two of our handy Shot Sticks for keeping the shotgun rounds in place.

Combine our new Padded Load Bearing Harness, Teargas Mask/Hydration Pack with the Chest Rig and you've got yourself one effective less lethal guy!

ITEM # 1000-009

LLOYD

"Less Lethal or You Die"

This item has been developed to allow for safe realistic impact munitions training. LLOYD's super lightweight and mobile design allows you to take him just about anywhere. LLOYD can be placed on the PVC pipe stand or hung from the shoulder loops. Constructed of abrasion resistant 1000 denier Cordura nylon fabric for a long service life.

LLOYD can be easily removed from the stand and used in officer down drills. One real benefit is that he only weighs 9 lbs. The PVC stand breaks down into 3 parts that lay flat for convenient storage. Mesh openings in the bottom of the legs and arms allow water to drain out if it starts raining during training or if he needs to be washed off.

As he is shot over time he will need to be fed through the hole in his head. LLOYD's diet consists of shipping "peanuts/popcorn". Upon impact this material provides a great response similar to a live person. Use him to train and test your officers on proper shot placement.

Please Note - Shipping cost for LLOYD is higher than other items due to the box size that must be used. Average shipping runs from \$30.00 to \$50.00 per box depending on where you are located. Two LLOYDs with stands can ship in one box for this price.

ITEM # 1000-15
color - Orange or OD Green

color - Black, OD Green, Camo
Price - \$59.95 each
* Contents & Patch not included *

Supervisor Emergency Munitions Bag

The Supervisor Emergency Munitions Bag has been created for those agencies that want to limit their chances of officers running out of ammo during an extended gun battle. This item is based around our Miami Riot Control Pack (seen on page 6) with the addition of two outer pockets for carrying a Shot Stick. We have also added a layer of plastic in the bottom to

help carry the weight of the ammo. The center compartment has a removable divider to help separate pistol ammo from patrol rifle ammo. With this bag your supervisor can re-stock officers in need with shotgun, pistol and rifle ammo. Each bag comes with four Shot Sticks and a 1 1/2" removable shoulder strap.

ITEM # 3500-200

*** Includes 4 Shot Sticks ***

color - Black, OD Green, Camo

Price - \$129.95 each

** munitions not included **

PepperBall Launcher Case

With more and more agencies using the PepperBall System than ever before, MTS decided it was time to create a top of the line weapons case. Our case was designed to bring all the supplies and weapons system to the scene. Including spare munitions as well as additional air. This bag is fully padded and compartmentalized to meet the needs of even the most demanding agency. The weapons case will hold 3 spare munitions speed pods, a spare air cylinder and has straps to securely hold the weapon in place. Another feature is removable backpack straps that free up your hands to carry additional gear.

ITEM # 1000-100

Medic Thigh Rig

This item is a must have for any officer assigned to the role of tactical medic. Designed to be used either by itself or in conjunction with a medic pack. By placing the kit on the front of the thigh rather than on the side, you can easily view and access essential supplies. No more fumbling around in a side pocket when seconds count!

Features of this bag include a contour design to hold the kit firmly to your leg, adjustable shock cord loops with cord locks, divided compartments top and bottom, adjustable dual 1 1/2" DuraFlex quick release leg straps along with an adjustable quick release belt strap, YKK #8 coil zipper. Constructed of 1000 denier Cordura nylon.

Tactical Medic Kit

An exceptional all around kit to carry equipment for dealing with trauma in a tactical environment. Designed to meet the needs of today's medics who demand a compact yet compartmentalized bag for their critical emergency supplies. MTS offers this case in two sizes. The operator's version (standard) and a command version (large).

Features of this bag include: two zippered solid fabric wing pockets, two zippered mesh wing pockets, two flat internal zippered pockets and a zippered flat pocket on the outside with velcro for patches. The back has loops to attach this bag to a belt or to our modular vest system. The single handle design reduces risks of the bag getting caught on snags in the field.

Hard Armor Plate Carrier

Our hard armor carrier is designed to provide superior comfort from even the heaviest of hard armor plates. Plates are inserted from the body side of the vest and use a Velcro flap to keep them in place. With today's criminals escalating to greater firepower, all departments should be considering putting hard armor plates into each cruiser. Our vest fills this need because of its one size fits all design. Additional models are available allowing officers to add either sewn on pockets or a modular grid for accessories. Our standard model is designed for ballistic plates measuring 10" x 12" x 1". Vest can be altered to fit any plate on the market.

Modular Tactical Vest

MTS is proud to introduce our new line of modular tactical vests. We have combined many years of building custom load bearing vests into this project. You will find that this vest offers unique features not found on our competitor's models. Our goal in developing this vest was to provide the tactical officer with one vest system that could "scale" up or down based on the callout. The vest is based on a full modular webbing grid attachment system that is similar to the new military vests. The front wing panels can be made to interchange with others in your unit who have our same vest. Many officers requested that we combine the well-liked features of a front opening vest with the ease of a side opening vest. No longer does it take two of you to suit up. As with all of our products, we can customize any item to meet your exact needs.

Separating shoulders for rapid removal of the vest in an emergency.

The front wing panels not only allow you to configure the vest using modular pockets but they are removable as well, in case you want to configure two or three different rapid response setups.

Side openings pull towards the front for ease in suiting up.

ITEM # 1500-050
 * Armor **NOT** Included *
 color - Black, OD Green, Camo
Price - call for details
 * contents not included *

The front panels attach at the front using a zipper, hook & loop and a snap and at the sides using two adjustable 1 1/2" quick release buckles.

Several options include drop-down groin protection, shoulder biceps protection, internal plate carriers, neck/throat protector and many more.

**** Soon to be offered with IIIA ballistic panels ****

Less Lethal Munition Vests

We provide a complete line of load bearing less lethal munitions vests. Our vest provides the team's munitions specialist an effective means of transporting and deploying less lethal munitions. As with all of our vests, they can be customized to meet your agency's needs. Shown here are some of our more popular designs. These vests can be built using modular pockets adding even more versatility. Pockets can be configured using the snap & velcro system or our modular webbing system.

Design features like divided slots for 37mm, zippered shotgun munitions pockets, internal web harness, 1000 denier Cordura nylon outer shell, 420 Pack Cloth lining make this one great deal.

Designed to meet the needs of the majority of departments, this version will handle most roles asked of today's munitions specialist. Designed to carry 16 rounds of 37mm munitions, 24 rounds of 12ga shotgun, 7 canister-type munitions and a radio.

Tactical Load Bearing Vests Custom Designs

Magnum produces the best tactical load bearing vest on the market today. We have stock and custom models to choose from, but for the most part our vests are custom works. Officers have input in not only how the vest will fit but the location of pockets specific to the officer's needs. Choose from our zip-up front or side closure models. We offer sewn-on pockets, modular snap/velcro and modular web attachment methods. For large team orders we will even build samples to ensure that the custom design is exactly what the team wants. Don't let the photos below fool you into thinking that these are the

only models available. We have been building vests for quite a few years and have a wide latitude when it comes to options. Call us today to find out more details on our line of vests!

Most vests are constructed of 1000 denier Cordura nylon with a 420 Pack Cloth liner. We use Mil Spec webbing, DuraFlex plastic hardware, YKK zippers, Pull-DOT snap fasteners and Rip'N Grip hook & loop.

Pricing on our vests varies greatly due to the wide range of options we offer. For the most part our custom vests run an average of \$229.95 each. Some are higher and some are lower. All this is based on the configuration chosen. Call us for a quote today and compare our custom prices against others in the industry!

H&K G36 Weapons Case

Designed for the State of Georgia's tactical response team, this heavily padded case holds the new H&K G36K weapon. Inside pouches with velcro lids hold both a twin magazine and a single magazine. The gun can be carried with a magazine in the weapon or without. Two 3/4" quick release straps have been strategically placed to hold the weapon in place. Two large outer pockets are for storage of additional ammo and other related items.

Constructed of 1000 denier Cordura nylon fabric, YKK #8 & #10 nylon coil zippers, dual sliders on all zip-pers, Mil Spec nylon webbing, removable 3/8" & 1/4" mini-cell foam padding.

ITEM # 3500-005

Price - \$129.95 each
color - Black, OD Green, Camo

H&K MP5 Weapons Case

Our deluxe MP5 weapons case is based around our M4 - DLX weapons case shown on page 18. This bag takes weapons transportation and storage to a whole new level. One advantage of the new MP5 version is that the center divider has no pouches on it. This allows an officer to use the pad as a small shooting mat or to provide a padded surface while servicing the weapon. Our superior weapons retention system holds the firearm securely in place inside of the bag, helping to reduce movement and damage to the firearm.

Features include removable padded center divider, removable back pack straps, pouches for three magazines, pocket next to the weapon for removable optics, access to remove foam for simplified cleaning, padded border and many other features.

Urban Sniper Rifle Case

This design came at the request of a federal law enforcement agency whose area of operation primarily consisted of high-rise and developed urban areas. They wanted a sniper rifle case that would blend in better to the setting than that of a true "Drag Bag". We have even gone as far as screen printing a bogus company logo on the side to further throw off curious on-lookers.

This bag offers plenty of room for accessories in three internal pockets and two outer pockets. Removable shoulder straps can be stored in an outer pocket to be used once inside areas such as stairwells. The weapon is secured using a method only found on MTS products. Additional items can be added like our padded shooting mat (shown with our Drag Bag). Bag is constructed of 1000 denier Cordura nylon with dual construction foam padding for superior protection. Will fit most 26" or shorter tactical sniper rifles. As with all our weapons cases, we manufacture custom versions to fit unique-sized weapons.

Tactical Sniper Rifle Case

Our tactical sniper rifle case has been designed to meet the needs of today's law enforcement sniper operating in an urban & woodland environment. The case has two padded external pockets, 3/4" webbing loops on both the front and back for attaching camo strips, cleaning rod sleeve, removable padding for cleaning, hide-away shoulder straps, protective cover flaps on all zippers, removable shooting mat (optional) with 1/4" minicell foam padding, stealth zipper sliders, barrel loop, 3/8" minicell and 1/2" open cell foam to protect the weapon with 1/4" mini-cell edge foam to protect the sides.

Our case is narrower than others on the market while at the same time providing maximum protection to the weapon. A special weapon attachment system was developed for securing the weapon placement inside the case, reducing overall movement.

Material features include: 1000 denier Cordura nylon fabric, YKK #8 & #10 nylon coil zippers, mil. spec. nylon webbing and rugged National Molding plastic hardware.

3/4" Quick release buckles hold weapon in place along with a fabric cover to protect the weapon's stock from damage.

Padded pockets with 3/4" quick release buckles help to secure and protect sensitive gear.

Removable shoulder straps are kept in the hide-away compartment until needed. Gun can be carried up or down by changing the strap configuration.

Removable padded shooting mat folds up and secures inside the case with 3/4" quick release buckles.

Tactical Rifle Scope Cover

This oversized scope cover has been developed to protect even the largest rifle scope. Simple on/off design for adding one more layer of protection to the weapon system. This item can be either used independently of the Drag Bag or in conjunction with the bag. Also available but not shown is a barrel sleeve. Contact us with your difficult to fit optic and we'll come up with a solution.

Modular Cell Extraction Suit

Major improvements went into our newly designed Modular Cell Extraction Vest. Because of the modular design the vest is no longer limited to inside the correctional facility. We have many agencies that use our vest for riots and other actions. The new design is based around our time tested original Padded Cell Extraction Vest. The standard PCEV can be found in many agencies throughout the United States and is still selling strong today. The new version allows an agency to change pocket configurations around the officer's duties.

Need more pockets, you can add them. Need less pockets, just take them off. Interior components of this vest provide the same impact protection as our standard PCEV with the addition of a new neck/shoulders/biceps protector now offered as an option/upgrade to our standard PCEV models. We have many stock pocket configurations to choose from or we can design a special pocket to your specifications. Call us today to find out details on how this vest can be incorporated into your Mobile Field Force.

Version shown includes the base vest, cape and groin protector. Pockets shown are the 40mm, radio, Std. combination set, shotstick, teargas/hydration. Many other combinations are available. Shown as an example.

Standard Cell Extraction Suit

This item has been manufactured by MTS since January of 1996 and to this day is one of our trademark products. It has proven itself to be a superior piece of protective equipment with a very economical price tag that no correctional facility can afford to be without. Our suit is designed to protect officers from blunt trauma-related injuries during forced cell extractions, at the same time providing them with the needed pockets to carry OC spray, handcuffs, leg irons and a small first aid kit. The suit's impact resistance is achieved by using three different protective materials stacked together in layers to maximize protection with the added benefit of a light-weight garment with enhanced mobility.

The vest straps are secured to the back of the vest to reduce inmate's ability to tear the vest off officers. The outer shell is constructed of rugged 1000 denier Cordura nylon with a nylon 420 Pack Cloth liner built to withstand the toughest abuse. The suit's outer shell is removable for easy cleaning similar to standard body armor carriers.

The complete Cell Extraction Suit consists of a 4 pocket vest, shoulder biceps protectors, groin protector, forearm/hand protectors and the shin/knee protectors.

"Request a demo suit for test & evaluation"

Contact us if your agency is interested in testing one of our suits. We will fax you a request form that must be filled out in order to receive a test suit. All suits are sent for period of 15 days.

Concealed Carry Paddle Holster

This holster has been designed for both the off-duty officer and officers assigned to special details who want the maximum in both concealment and function. Let's face it, the fanny packs are out. What criminal doesn't think COP when he sees a person wearing a waist bag? The sturdy paddle on the back is by the folks from Edge Works Holsters in NC and provides easy on/off service. Inside are two elastic loops for magazines, a weapons holder that is held in place using Velcro and a slot for handcuffs. The zippered design allows an officer to "quietly" access their weapon without making a sound.

Another unique feature is that the outside of the holster is embroidered with a logo (several to choose from) that further throws off a suspecting person as to the contents.

Small Padded Pistol Case

This bag is targeted towards the shooter who has a special pistol they want to protect in addition to storing extra magazines and accessories. Case includes a basic sleeve holster, dual mag pouch, padded center divider that is removable. Full padded wrap around design helps protect weapon from damage. Small zippered outer pouch for items such as manuals and shooting logs. Both the holster side and the accessories side have Velcro for easy modifications or changes down the road, keeping you from having to buy another bag.

Electric Monitoring Bag

Specialty Medic Equipment - Bomb Tech Tool Bag

Used by parole officers working in the field with individuals who are under house arrest and monitored with an electric monitoring bracelet. This case allows the officer to carry all needed supplies, including those tiny little screws, in one organized package. No more forgetting one little part or cord. Features include a zippered outer pocket, two smaller internal pockets, a pocket for a Plano 3600 plastic storage box (included) and dividers for items like screwdrivers and cutters. All of this is combined in a nice neat package for a very professional appearance.

Constructed of 1000 denier Cordura nylon fabric, YKK #8 nylon coil zippers with dual sliders, Mil Spec webbing, Duraflex plastic hardware and Plano 3600 plastic Stow-Away box.

Carry All 3 Standard

This multi-use bag has withstood the test of time in the ranks of items we manufacture. This item is sought by officers needing a durable patrol bag to carry day to day gear. Many officers purchase extra bags for family members to be used as travel bags. Features three zippered outer pockets and one main center compartment with a shoulder strap. This perfectly sized bag makes a great gift item.

Constructed of 1000 denier Cordura nylon fabric, YKK #8 & #10 nylon coil zippers, Mil Spec webbing and Duraflex plastic hardware.

ITEM # 4000-005
* contents not included *
Price - \$99.95 each
color - Black, OD Green, Camo

This gear bag, boasting an impressive 6,283 cubic inches of storage space, was designed for the Georgia Department of Corrections riot control teams operating at the 1996 Olympics in Atlanta. Five outer pockets plus a healthy center compartment provide ample space for any tactical operator. A detachable shoulder strap and HDPE base plastic help keep heavy items from shifting towards the center when carried. The dimensions of the overall bag are 30"W x 14"H x 19"D. Elastic loops, backed up with an overstretch protective strap, hold the officer's baton on the outside of the bag just above the pocket.

Constructed of 1000 denier Cordura nylon fabric, YKK #8 & #10 nylon coil zippers with dual sliders, Mil Spec webbing, Duraflex plastic hardware and HDPE plastic in the bottom.

Our Background

We opened the doors of Magnum Tactical Supply in February of 1989 with the goal of providing high quality nylon gear to special operations officers.

Years later we still have that mission in mind. Magnum is a unique company in that 100% of our operations are based here in the United States. We have a dedicated workforce operating in a small facility near Atlanta, Georgia. The advantage a small company like ours offers the officer is our ability to make product modifications quickly and efficiently. One of the ways we have accomplished this over the years is through the addition of computerized equipment in our design, cutting and sewing departments. By using technology to our advantage we can meet the needs of agencies both small and large.

We provide high quality equipment solutions to meet the requirements of a changing world. Our staff takes time to listen to officer's recommendations on both current and new product ideas. Who better to listen to than the folks who are facing situations in our ever-changing law enforcement community on a day to day basis? Your advice on product modifications pushes us to always be improving our product line so that all officers will benefit.

I know how important quality equipment is to winning. I worked as a full-time firefighter/EMT for 10 years and have a brother and a brother-in-law who are both law enforcement officers. Magnum manufactures exceptional gear for exceptional people who put their lives on the line every day to protect us.

As we progress into the future Magnum will push the limits of technology. New materials will be developed allowing us to further enhance our product line. This desire to improve assures officers that they will always receive the best that money can buy when they deal with Magnum.

If you or your agency has a new product idea and would like to have it manufactured please contact our design staff for details. Our full service custom department has met the needs of officers from across the US for many years and will continue to offer support as we move into the future.

Thanks to all of our customers over the years who have made this company a real leader in the tactical industry. Your advice and support on product development has been instrumental in producing the finest nylon gear available.
