

Tactical Medic Kit

An exceptional all around kit to carry equipment for dealing with trauma in a tactical environment. Designed to meet the needs of today's medics who demand a compact yet compartmentalized bag for their critical emergency supplies. MTS offers this case in two sizes. The operator's version (standard) and a command version (large). Features of this bag include: two zippered solid fabric wing pockets, two zippered mesh wing pockets, two flat internal zippered pockets and a zippered flat pocket on the outside with velcro for patches. The back has loops to attach this bag to a belt or to our modular vest system. The single handle design reduces risks of the bag getting caught on snags in the field.

Modular Medic Kit Carrier

This pouch is designed to carry a hydration pouch in one compartment with our Standard Tactical Medic Kit in the other. A unique upside down pocket allows for rapid deployment of medic pack. This item will fit any tactical vest that uses the two inch on center snaps and velcro or modular webbing configuration. Loop velcro is sewn on the outer face to allow for agency patches.
