

H&K MP5 Weapons Case

Our deluxe MP5 weapons case is based around our M4 - DLX weapons case shown on page 18. This bag takes weapons transportation and storage to a whole new level. One advantage of the new MP5 version is that the center divider has no pouches on it. This allows an officer to use the pad as a small shooting mat or to provide a padded surface while servicing the weapon. Our superior weapons retention system holds the firearm securely in place inside of the bag, helping to reduce movement and damage to the firearm.

Features include removable padded center divider, removable back pack straps, pouches for three magazines, pocket next to the weapon for removable optics, access to remove foam for simplified cleaning, padded border and many other features.

Urban Sniper Rifle Case

This design came at the request of a federal law enforcement agency whose area of operation primarily consisted of high-rise and developed urban areas. They wanted a sniper rifle case that would blend in better to the setting than that of a true "Drag Bag". We have even gone as far as screen printing a bogus company logo on the side to further throw off curious on-lookers.

This bag offers plenty of room for accessories in three internal pockets and two outer pockets. Removable shoulder straps can be stored in an outer pocket to be used once inside areas such as stairwells. The weapon is secured using a method only found on MTS products. Additional items can be added like our padded shooting mat (shown with our Drag Bag). Bag is constructed of 1000 denier Cordura nylon with dual construction foam padding for superior protection. Will fit most 26" or shorter tactical sniper rifles. As with all our weapons cases, we manufacture custom versions to fit unique-sized weapons.
